Most durable, because the combination of the Springs is such as to give perfect clasticity to the gear, thereby entirely obviating the sharp side motion and consequent strain on the Wheels and other parts of the Wagon, allowing the Wagon to pass over all irregularities of the road without winding or cracking the box, or jerking, or meaning ince to those riding. The binding of the circle, a necessity with all other Platform Wagons, is clarely obviated, allowing the Wagon to tallow the road without crowding the team from ride to sade.

#### A PLEA FOR CUBA.

Dispatches state that considerable uneasiness prevails in political circles in New York, in consequence of certain exciting rumors in regard to what is alleged to be the policy determined upon by the Government with reference to Cuba. The rumor is that notice has been given to the Spanish Government by our own to the effect that if the fighting in Cuba be not ended by the 1st of January next the United States will recognize the insurgens as belligerents. It is further predicted-upon what authority does not appear—that the President's message to the next Con-

Without arms, discipline, or generals, the in surgents have maintained themselves against forces superior in number and provided with all the appointments of modern warfare.
